<i>Description: This project is a seismic upgrade of 2 existing hazardous chemical tanks, which address issues identified in an internal review of CalARP regulations. The 2 tanks are a 7,500 Gal Aqua Ammonia Tank, and a 20,000 Gal Acrylonitrile Tank. The construction work consists of structural addition to the Aqua Ammonia Tank foundation, and process piping support of both Aqua Ammonia and Acrylonitrile. The Aqua Ammonia Tank pedestal and foundation construction will be done during a 1 week turnaround on a 24-hr work schedule. Tank pedestals will be strengthened with additional rebar, concrete, and stiffener plates. Prework includes emptying, rinsing, and isolating the tank and lines. Aqua Ammonia and Acrylonitrile process piping will need new additional supports where lateral restraint is deficient, which consists of installing U-bolts, clevis hangers, and correcting notched supports. Approximate Breakdown of Project Workload: 80% Aqua Ammonia Tank Pedestals and Foundation 10% Aqua Ammonia Process Piping Support 10% Acrylonitrile Process Piping Support</i>
