<i>Description: Cast in place concrete piers required at SE corner of property due to unforeseen conditions. The subgrade conditions near an existing building close to the SE corner of the property were discovered to be unsuitable for required soil off-haul and recompaction without disturbing the extant neighboring building. Structural Piers are required to support slab on grade walkway and site wall to avoid extensive soil removal and recompaction called for by the geotechnical report. These changes are clouded with delta "C" on drawing sheets.</i>
