Fixed-Income Sector Commentary – 4Q 2023

- ▶ **U.S. Treasuries** yields are lower by 70-80 basis points over the quarter for maturities greater than one year as markets have now priced five to six rate cuts in 2024. While the curve remains inverted, yield levels remain above their 30-year averages.
- ▶ **Federal agency** spreads remained tight and issuance was light. As a result, value during Q4 was limited. Excess returns of callable structures outperformed bullets as spreads narrowed from historical wides.
- ▶ **Supranational** spreads, similar to agencies, remained low and range-bound on limited supply, favoring opportunities in other sectors.
- ▶ **Taxable Municipal** issuance remained heavily oversubscribed due to a lack of supply. The secondary market had limited opportunities to pick up yield versus similarly-rated corporates.
- ▶ **Investment-Grade Corporates** were one of the best performing fixed-income sectors for both Q4 and calendar year 2023. After a brief broad market de-risking in late September and most of October, the IG corporate sector did an about-face and finished the year with spreads rallying to their lowest levels in over nine months. Strong economic conditions, the increasing perception of a soft landing, and robust demand for the sector fueled the market rally, as longer duration and lower quality issuers outperformed.
- ▶ **Asset-Backed Securities** generated positive excess returns in Q4, although not to the same extent as corporates. While spreads tightened into year-end, the relatively muted rally vs. other non-government sectors possibly underscores the market expectation for modestly weaker consumer fundamentals moving forward. Incremental income from the sector remains attractive and our fundamental outlook for the economy is supportive for the sector.
- ▶ **Mortgage-Backed Securities** were one of the best performing investment grade sectors in Q4 despite a roller coaster pathway. After widening in October to their highest levels since the spring of 2020, spreads proceeded to rally into year-end, finishing near nine-month lows.
- ▶ **Short-term credit** (commercial paper and negotiable CDs) spreads tightened over the quarter and the credit curve flattened modestly. Shorter-term maturities are less attractive and we prefer issuers with maturities between 6 and 12 months.
